SUMMARY

Developer and creative with experience in full-stack web development, library development, and developer tooling. Specializing in TypeScript and Node.js to craft exceptional experiences and support organizations' technical needs.

EDUCATION

Occidental College —

August 2018-May 2022

Small Liberal Arts school in Los Angeles, CA

Bachelor of Arts in Computer Science

Minors in Studio Art and Media Arts and Culture

Relevant Course Studies: Full Stack Web Development, Mobile App Development, Game Design, Robotics, Data Science, Operating Systems, Data Structures, Animation, Screenwriting, Experimental Media

EXPERIENCE

Frontend & CRM Engineer —

September 2026-Present

Waybetter Marketing — Enrollment marketing and Slate services for higher education

Columbia, MD

- Developing engaging, student-facing webpages with a mobile-first approach.
- Optimizing webpages for maximum speed, scalability, and maintainability.
- Optimized website performance to achieve 5-10x faster loading speeds, significantly improving user experience.
- Troubleshooting, building, and maintaining highly reusable, modular code libraries to accelerate future projects.
- Conducting thorough QA testing to ensure accuracy, usability, and visual fidelity across devices and browsers.

Creative Director & Developer —

November 2020-Present

N. Escobar Media — Small independent production studio

Rockville, MD

- Founded N. Escobar Media, an independent production studio building innovative digital experiences and finding solutions to niche problems, using a wide variety of tools for both internal projects and external clients.
- Actively releasing projects, including: a number of JavaScript & TypeScript packages — like [modpack-lock](#) and [steploop](#), games built in Godot and on hardware — like [Starfish](#) and [the BumbleBee](#), other media projects and animations — like [The Poets Are Coming](#), and more.
- Collaborate with clients to plan, design and build solutions to their needs, emphasizing clear communication with frequent updates, regular meetings and comprehensive plans outlining timelines, milestones and deliverables.

IT/Website Coordinator —

June 2023-September 2026

Project Create — Non-profit providing art education for youth in the city

Washington, DC

- Oversaw Project Create digital infrastructure, including maintaining the [Project Create website](#), IT administration, software/hardware troubleshooting, and on-site event technical support.
- Built and refined web pages by turning visual concepts, designs, and provided assets into responsive, polished layouts that support programs, fundraising, and community engagement.
- Optimized website performance to achieve 5-10x faster loading speeds, significantly improving user experience.
- Implemented a digital asset management system to serve as a central repository for the organization's assets, streamlining access and reducing retrieval times, making collaboration easier and more efficient.
- Spearheaded NordPass password manager rollout, migrated organization credentials, performed platform administration, and trained staff — strengthening organizational security and encouraging secure credential sharing.
